

Contents and Subject Index

1. INTRODUCTION	1
2. NEAT THERMOPLASTIC RESINS PROPERTIES	3
2.1 Introduction.	3
2.2 Properties of Neat Thermoplastic Resins	4
2.2.1 Chemical Structure and Some Physical Properties	4
2.2.2 Thermal Properties	13
2.2.3 Mechanical Properties.	21
2.2.4 Toughness	21
2.2.5 Non-Linear and Time-Dependent Behavior.	28
2.2.6 Chemical Resistance.	28
2.2.7 Water and Moisture Resistance.	32
2.3 Characteristics of Some Thermoplastic Polymer Families	33
2.3.1 Polyketones	33
Polyetheretherketone (PEEK)	33
Polyetherketoneketone (PEKK)	36
Polyetherketoneetherketoneketone (PEKEKK).	36
Polyetherketone (PEK).	36
2.3.2 Polyarylene Sulfides.	36
Polyphenylene Sulfide (PPS)	36
Polyarylene Sulfide (PAS-2)	37
Polyphenylene Sulfide Sulfone (PPSS).	39
2.3.3 Polyamides.	39
Polyamide J-2.	39
Polyamideimide (PAI) Torlon	39
2.3.4 Polyimides	40
Polyimide K-Polymer	40
Polyimide N-Polymer	41
Polyimide Eymyd	44
Polyketoimide Larc-TPI	44
Polyetherimide PEI	44
2.3.5 Polysulfones.	45
2.3.6 Liquid Crystalline Polymers.	46
2.3.7 Polybenzimidazoles (PBI)	49
2.3.8 Polyphenylquinoxalines (PPQ).	50
2.4 Summary.	50

3. MORPHOLOGY	53
3.1 Introduction.	53
3.2 Factors Influencing Morphology of Semi-Crystalline Thermoplastics	53
3.2.1 Processing Conditions.	53
3.2.2 Foreign Surfaces	58
3.3 Morphology-Property Relationships of Semi-Crystalline Thermoplastics.	60
3.4 Summary.	64
4. PERFORMANCE OF THERMOPLASTIC BASED COMPOSITES	67
4.1 Introduction.	67
4.2 Room Temperature Mechanical Properties	67
4.3 Elevated Temperature Mechanical Properties	75
4.4 Damage Resistance and Tolerance.	78
4.4.1 Interlaminar Fracture Toughness	78
4.4.2 Delamination Behavior	81
4.4.3 Damage Tolerance.	83
4.5 Fatigue Resistance.	86
4.6 Time-Dependent Behavior.	89
4.7 Resistance to Thermal Cycling and Ionizing Radiation	91
4.7.1 Thermal Cycling	91
4.7.2 Electron Radiation	91
4.8 Summary.	92
5. PROCESSING OF ADVANCED THERMOPLASTIC COMPOSITES	96
5.1 Introduction.	96
5.2 Advantages/Disadvantages.	96
5.3 Treatment of Fibers.	97
5.4 Combination of Fibers with Matrix.	98
5.4.1 Hot Melt Coating.	99
5.4.2 Solution Processing	99
5.4.3 In-Situ Polymerization of Monomers or Prepolymers	101
5.4.4 Film Stacking	101
5.4.5 Powder Coating.	102
5.4.6 Fiber Hybridization	102
5.5 Lay-Up	108
5.6 Processing Techniques for Thermoplastic Composites.	108
5.6.1 Melting	108
5.6.2 Consolidation	108
5.6.3 Solidification	110
5.6.4 Residual Stresses	110
5.6.5 Models	111
5.7 Processing of Flat Thermoplastic Laminates	111
5.7.1 Compression Molding.	112
5.7.2 Autoclave Technology	112
5.7.3 Automated Lamination and Consolidation	112
5.8 Forming Techniques	113
5.8.1 Matched Die Press Forming.	114
5.8.2 Rubber Pad Press Forming	114
5.8.3 Diaphragm Forming.	117
5.8.4 Hydroforming.	117
5.8.5 Autoclave/Vacuum Forming	117
5.8.6 Filament Winding	120
5.8.7 Pultrusion	120
5.8.8 Roll Forming	121

5.9	Machining of Thermoplastic Composites	121
5.10	Reprocessability	121
5.11	Summary	123
6.	JOINING THERMOPLASTIC COMPOSITES	125
6.1	Introduction	125
6.2	Mechanical Fastening	125
6.3	Adhesive Bonding	126
6.4	Fusion Bonding (Welding)	126
6.4.1	Heated Tool Welding	128
6.4.2	Resistance Heating	128
6.4.3	Induction Heating	129
6.4.4	Electromagnetic Heating	129
6.4.5	Heated Fasteners	129
6.4.6	Ultrasonic Welding	130
6.4.7	Friction/Vibration Welding	130
6.4.8	Thermoplastic Amorphous Bonding	130
6.5	Experimental Comparisons	132
6.6	Summary	135
7.	COSTS AND AIRCRAFT APPLICATIONS OF THERMOPLASTIC COMPOSITES	136
7.1	Costs of Thermoplastic Composites	136
7.2	Examples of Use of Thermoplastic Composites in Aircraft Applications	138
7.2.1	Westland 30-300 Thermoplastic Tailplane	138
7.2.2	Advanced Tactical Fighter (ATF) and B2 Stealth Bomber	141
7.2.3	Wing of the U.S. Navy/McDonnell F/A-18 Fighter Aircraft	141
7.2.4	Landing Gear Strut Door and Access Panel	142
7.2.5	Strut Fairings on the Boeing 757-200's Jet Engines	143
7.2.6	Aerosurface Components on Subsonic Missiles	143
	Harpoon Missile	143
	Tomahawk Missile	143
7.2.7	Glass/PES Hercules Radome	146
7.2.8	Boeing's YC-14 Carbon/Polysulfone Elevator	146
7.2.9	Nose-Wheel Door for the Fokker-50 Aircraft	148
7.2.10	Thermoplastic Composite Fighter Forward Fuselage	148
7.3	Summary	150
8.	SUMMARY, CONCLUSIONS AND RECOMMENDATIONS	152
8.1	Neat Thermoplastic Resins	152
8.2	Morphology	152
8.3	Thermoplastic Composites	153
8.4	Processing	154
8.5	Joining	154
8.6	Aircraft Applications of Thermoplastic Composites	155
9.	REFERENCES	156
