Index

3-D braided fabrics 20
3-D braided composite blade 33
3-D forming 241
3-D knitted fabrics 19
3-D woven fabrics 15

Aerospace applications 56
Autoclave 292

Braid consolidation 229
Braided fabrics 116, 217

Car applications 6, 58
Cartesian braiding process 221
Ceramic matrix composites 23
Clasiffication of textile preforms 11
Coefficients of thermal expansion 177
Complementary energy elastic model 84
Complementary energy strength model 88
Composite grids 151
Course 181
Crimp model 27
Crossover model 201

Damage tolerance 48
Debonding 187
Degassing 290
Degradation of composite performance 46
Draping simulation 266

Energy absorber 134
Engineering parameters 39

Fabric geometry model (FGM) 27, 30
Failure envelopes of grids 164
Failure models 90, 137
Fiber to fabric process (FTF) 12
Finite element models 74, 120, 265, 273
Forming process 256
Fracture plane 187

Geometric model 79
GMT 54
Grids with skins 172

Hand impregnation 288
Homogenization problem 85
Hybrid structures 54, 80, 82

Isogrid 161, 175
Impregnation techniques 55
Interlaced joint grid 158

Knitted 3-D fabrics 17, 19, 124, 180
Knot elements 62

Lenticular yarn 80
LIBA system 18
Liquid moulding with vacuum 295

Macromechanical theories 102
Manufacturing costs 1
Mass of warp integrating yarn 300
Mass of warp stuffer yarn 301
Mass of weft integrating yarn 302
Mass of weft stuffer yarn 303
Mass of weft yarn 302
Matched-die moulding 289

Mechanical properties of grids 159
Metal matrix composites 22
Micromechanical models 70, 196
Modelling of 3-D textile composites 24
Multiaxial warp knit technology (MWK) 18
Multilevel descomposition scheme 81
Multipoint approximation method 277

Novolted method 12

Optimisation 248, 275
Orthogonal non-woven fabrics 16
Orthogonal woven fabrics 17

Parametric studies 92
Prediction of composite modulus 305
Prediction of fabric properties 298
Preimpregnation 291
Pressure Foot Process 18
Processing parameters 39

Railways applications 64
Resin Film Infusion 297
Rib buckling 168
RTM 54
Rubber forming 251

Scrimp process 55
Slotted joint grid 157
SMC 54
Solid braid 222
Solid braider 222
Spinning of yarns 242
Stacked joint grid 157
Strength model 88
Strengthening effect 21
Structural integrity 50

Tensile behaviour of knitting 184
Toughening effect 21
Turbine blade 33

Undulation 46
Unit cell 17, 28, 79, 82, 83, 84, 270

Vacuum bagging 291

Wale 181
Warp knitted fabric sandwich 128
Weaving of yarns 242

Yarn-to-fabric preforms 13
Yarn to fabric process (YTF) 12,13
Yarn grouping 224
