## **PART 1—FUNDAMENTALS OF CONSTITUENTS FOR COMPOSITES MANUFACTURING**

<b>1. Introduction</b> . . . . .	<b>3</b>
Examples of Products Made Using Different Manufacturing Techniques	3
General Characteristics of Manufacturing Using Composites	13
Functions of the Constituents of Composites	19
References	41
Appendix	41
Homework	43
<b>2. Matrix Materials</b> . . . . .	<b>45</b>
Introduction	45
Different types of Matrix Materials and Their Prominence	45
Thermoset Matrix Materials	50
Thermoplastic Matrix	90
Fillers, Colorants and Other Resin Modifiers	95
Ceramic Matrices	96
Metal Matrix	96
References	97
Homework	97
<b>3. Reinforcements—Fibers</b> . . . . .	<b>99</b>
General	99
Individual Filaments	100

Tows 115  
Fabrics and Other Reinforcement Forms 116  
Deformation of a Bed of Fibers 123  
References 136  
Homework 72

**Part 2—TECHNIQUES FOR COMPOSITES MANUFACTURING**

**4. Hand Laminating (or Wet Lay-up) and the Autoclave**

**Processing of Composites . . . . . 141**  
Hand Laminating (or Wet Lay-Up) 141  
Autoclave Processing 143  
References 202  
Homework 204

**5. Filament Winding and Fiber Placement . . . . . 205**

Filament Winding 205  
Fiber Placement Process 230  
References 231  
Homework 231

**6. Pultrusion . . . . . 233**

General 233  
Materials 235  
Combination of Other Processes with Pultrusion 238  
Factors Affecting the Pultrudability of a  
Composite Component 143  
Summary 244  
Reference 246

**7. Liquid Composite Molding . . . . . 247**

Introduction 247  
Materials 255  
Mold Filling 262  
In-Mold Cure 283  
References 287  
Homework 287

**8. Long Fiber Thermoplastic Matrix Composites . . . . . 289**

Introduction 289  
Materials 291  
Preliminary Material Combinations (PMCs) 293  
Fabrication of the Final Product 301  
References 181
